

FINE ART PAPER · SMOOTH MATTE

Fibre Based Matte 280gsm

An ultra-smooth, high-white fine art paper made from 100% alpha cellulose. Its microporous coating gives prints the look of traditional fibre-based photographic prints. Acid free and lignin free to archival standards, with optical brighteners for a bright white finish.

280 gsm Weight	310 µm Thickness	>97% Opacity	12 -colour Epson OEM inks
--------------------------	----------------------------	---------------------------	-------------------------------------

APPLICATION

Best for	Limited edition fine art, portfolios, wedding albums, greeting cards
Protection	Glazing or a giclée varnish improves UV and ozone resistance

STRUCTURE

Base	100% alpha cellulose, microporous coating
Surface	Smooth matte, like traditional fibre art papers
Archival	Acid free and lignin free

STORAGE

Temperature	15–25 °C
Humidity	40–60% RH

Opacity	> 97%
Optical brighteners	Yes
CIE whiteness (D65)	136
Brightness (TAPPI)	110
White point	L 96.5 · a 0.9 · b –3.3
pH	7.5–9.5

INKS

Ink set	Epson 11 & 12-colour
Supply	Genuine Epson OEM only
Paper compatibility	Dye and pigment, Matte Black

We print with genuine Epson inks only, never third-party refills. The extended colour sets reach a wider gamut than standard four-colour printing, with deeper blacks, smoother tonal gradients and consistent colour from one order to the next.

WE ALWAYS RECOMMEND ORDERING SAMPLES

Figures on a sheet only tell you so much. The best way to judge whether your reproductions suit this paper stock is to order a sample and see your own artwork on it.

Specifications are typical values provided in good faith and do not constitute a guaranteed specification. We recommend testing under your own application and environmental conditions.
